

SVI WHAT'S NEW?

NEW BLUE

Looking to make a name for themselves in the highly competitive world of home audio is the team at Blue Aura with the release of the WS80i wireless speaker system. The WS80i marks Blue Aura's debut on the AV scene and the quality of the audio system is indicative of the 30 years of experience in the industry the team at Blue Aura possess.

The loudspeaker uses STS wireless technology operating at 44.1 KHz making it extremely robust and ensuring it isn't prone to interference from microwave ovens, telephones or wireless networks. The WS80i wireless system is supplied with two active speakers, a transmitter and multi-function remote control plus all the necessary accessories to enable you to listen to your favourite music. The transmitter connects to a multitude of audio sources and ensures sound quality is up to the requisite standard within a 25m range. Available in white or black and retailing at £399 the WS80i is on sale now.
